INCORPORATING "PORTLAND CEMENT"

Published by Concrete Publications Ltd., 20 Dartmouth Street, London, S.W.1

INDEX to VOL. VII, 1934.

	PAGE		PAGE
Aggregate, New lightweight	348	Goffin, O., and G. Mussnug, on Expansion and shrinkage of cements	144
Air elutriation of cement with electrical separation, by T. Kitazawa	312	Grun, R., and H. Beckmann, on Effect of ashes and stone on the properties of Portland cement	53
„ separation, by K. Nakayasu	89	Grun, R., and H. Marecke, on Effect of salts on Portland cement	308
„ separator, Tests on a mill with	341	Hess, Herr., on The lime-hydrate process of manufacture	370
Alkalis in cement, Estimation of, by W. Marschner	361	Honus, O. F., on Heat of hydration of cement and its constituents	157, 208, 244
Anhydrous calcium silicates, The system $\text{CaO-SiO}_2\text{-H}_2\text{O}$ at 30°C . and the reaction of water on, by E. P. Flint and L. S. Wells	345	Kitazawa, T., on Air elutriation of cement with electrical separation	312
Asbestos-cement, Recent innovations in the manufacture of, by E. Lechner	178	Koch, J., on Heat balance of rotary kilns	135
Ashes and stone on the properties of Portland cement, Effect of, by R. Grün and H. Beckmann	53	Krassowsky, K., on Action of sea water in slurry on the clinker-brick lining of a rotary kiln	287
AUTHORS :			
Baentsch, S., J. Parga-Pondal, and H. Kühl, on Permeability as a method of investigation for Portland cement	259	Kühl, H., on Standard specifications for Portland cement	193
Balthasar, K., on Magnesia and unsoundness	322	Kühl, H., and E. L. Meyer, on Magoesia in Portland cement	193
Beckmann, H., and R. Grün, on Effect of ashes and stone on the properties of Portland cement	53	Kühl, H., J. Parga-Pondal, and S. Baentsch, on Permeability as a method of investigation for Portland cement	259
Biehl, K., on Effect of trass-cement on large masses of concrete	288	Kyriacou, N. C., on Compound flame furnace for the burning of cement	309
Biehl, K., and W. Wittekindt, on The zeolitic nature of trass	290	Lechner, E., on Recent innovations in the manufacture of asbestos-cement	178
Bonnell, G. R., on The presence of silt and clay in sands used in cement mortars	100	Marecke, H., and R. Grün, on Effect of salts on Portland cement	308
Budnikoff, P., and S. A. Schicharewitsch, on The choice of rotary kiln linings	362	Marschner, W., on Estimation of alkalis in cement	361
Chassevent, L., on Action of water on Portland cement	361	Meyer, E. L., and H. Kühl, on Magnesia in Portland cement	183
Collada, P. P., on Heat insulation of rotary kilns	361	Miyasaka, M., and S. Nagai, on Effect of fluorides on thermal synthesis of calcium silicates	331
Craddock, Q. L., and W. Watson, on The chemical constitution of Portland cement clinker, 11, 54, 111, 169; on Components and systems having a possible bearing on Portland cement clinker constitution, 279, 313, 333; on Hydration and hardening of calcium aluminates and silicates	371	Möser, A., on Method of testing firebricks	292
Dorsch, K. E., on The hardening and corrosion of cement	45	Murakami, K., and S. Nagai, on Synthesis of calcium silicates	18
Eiger, A. J., on Hydration and strength of cement and concrete	231	Mussnug, G., and O. Goffin, on Expansion and shrinkage of cements	144
Erdmann, F., on Loss of heat in flue gas from shaft kilns	362	Nagai, S., and M. Miyasaka, on Effect of fluorides on thermal synthesis of calcium silicates	331
Ferrari, F., on High-strength cements	308	Nagai, S., and K. Murakami, on Synthesis of calcium silicates	18
Flint, E. P., and L. S. Wells, on The system $\text{CaO-SiO}_2\text{-H}_2\text{O}$ at 30°C . and the reaction of water on anhydrous calcium silicates	345	Nagai, S., and G. Sawayama, on Studies on the celite part of Portland cement	285
Frey, R., on Waste-gas temperatures of rotary kilns	205, 323, 349, 383	Nagai, S., and I. Yoshida, on Studies on Italian pozzolana and pozzolanic Portland cement	154
Fujii, M., and S. Yamamura, on Heat hydration	142	Nakayasu, K., on Air separation	89
Gierzt-Hedström, S., and D. Werner, on Some properties of cement and concrete	211	Parga-Pondal, J., H. Kühl and S. Baentsch, on Permeability as a method of investigation for Portland cement	259
Gilbert, Wm., on Heat transmission in rotary kilns	1, 123, 196, 295	Platzmann, C. R., on Special cements	61
		Prouteau, J., on Extensions and improvements to the D'Origny-Sainte Venoit (Aisne) cement works	73
		Richner, F., on Standard sand	290
